Que T. Le  
Primary Examiner

This is in response to Applicants' Preliminary amendment filed August 22, 2003.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a system to collect image data which is representative of an aerial image of a mask used in the manufacture of integrated circuits, wherein the mask includes features having a line width, comprising an image sensor unit disposed within a moveable platform having a plurality of sensor cells, each includes an active area which is smaller than the line width to sample light of a predetermined wavelength incident thereon; and a processing unit coupled to the image sensor unit to generate image data representative of the aerial image of the mask, wherein the processing unit generates aerial image by interleaving the image data sampled by each sensor at each discrete locations of the platform.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Lin 6,121,626 discloses a mask exposure system having an image sensor unit disposed within a moveable platform.
